Dear Friend,

Have you ever been in a situation where you knew something would work, and knew where you wanted to be, but you felt there was some kind of block stopping you from making that dream a reality?

That is exactly where I found myself 25 years ago. I was extremely broke, with less than \$100 in my bank to start and run my internet business, which I had been working at for over a year. Not only that but I was going to be a dad (at 21) in less than 4 months.

To top it off my car was broke, I had no stable place to live... MY LIFE WAS A MESS!

There were so many different sites and 'scams' telling me many different things that I had no idea who to trust or what to do.... it was so incredibly overwhelming.

I felt lost and completely unprepared... many times I just sat there depressed wishing someone would just take me by the hand and show me how the heck to make this internet business thing work. But no one would... they all just wanted the money I didn't have.

Despite my painful circumstances, I knew beyond a shadow of a doubt the internet was a powerful money making tool, probably the greatest in all of history.

I also knew that there had to be some way to make a comfortable living online... oh sure I read all the ebooks, got the dvd's, bought the software, and racked up a cool \$7,800 in credit card debt trying to learn this stuff.

It Seemed Like Everything Out There That Was "Supposed" To Teach Me "How To Make Money Online" was full of Hype, Lies, and Garbage, you know... nothing that "REALLY WORKED" for "REAL PEOPLE"... I Felt Completely Stuck... And I Wasn't Making A Dime...

Believe me, I understand if you are skeptical, and how frustrated you may be. We are only at the beginning of this letter and you've already seen some big claims. And if I were you id be wondering...

**Is This All A Bunch Of Hype Designed To
Get My Hard Earned Money?**

You are smart to be skeptical.

If I wasn't able to personally build these sites, and see the checks with my own eyes... I would be skeptical too.

In other words... I know how you feel...

For me it was pretty much impossible to find an easy step-by-step system I could follow to actually make a decent living online.

You might feel the same way. You might feel like everyone teaching this stuff is just trying to get you to fork over your hard earned money for a bunch of crap you'll never use.

So let me put your mind at ease by pulling back the curtain right now to show you exactly how this business works, how you can get involved, and more importantly how you can use the 'Simple Sites Big Profits' system to **put money in your pockets**.

Listen to the rest of this story to learn the truth about how internet marketing works and how you can build simple little websites to profit online with affiliate marketing...

Back when I was first starting to learn internet marketing I was working as a magician performing magic shows for kids birthday parties at about \$150 per show. It was fun, but hardly paid the bills.

Here Is The Picture I Used In My Magic Ads For Birthday Parties

Since the magic shows barely paid my bills... I decided to build websites on the side for local companies.

So there i was building little sites for limo companies and local business, and during summer of 2000 I had built a website for a local cigar company that my brother worked for.

The site was really basic and simple, because at that time *I didn't really know how to build a site*, i'm still not a great web designer, but I knew if I could make it easy to understand and easy for people to order I would be able to get new customers for this company and charge them a higher price for the site... a much, much higher price.

About a month after building this cigar website I noticed that it was getting ranked on the search engines for the word "cheap cigars" and people were pouring in daily to order cigars from all over the country.

The site was nothing elaborate - it just gave the users what they wanted, good cigars at a great price.

Flor De Gonzales

At that time I didn't even have an expensive web design software... I built that site with the free version of front page express that came with windows 98.

Even though it was a simple website built with a free program... IT SOLD CIGARS EVERY DAY!

So I started to think... Hey... I'm on to something here!

So I began testing my method on many other websites.

Starting with limousine companies and other local companies, I built simple, easy to understand, websites that gave users exactly what they wanted based on what they were searching for.

It worked like a charm... they ranked on the search engines, made sales, and the companies were very happy and hired me back often to get them even more business.

After a while I started to wonder... what would happen if I made these "Simple Sites" for myself and took the visitors to affiliate programs, adsense, and other things that would put money in MY pocket with less work, no phone calls, and no one to answer to.

I started building many different sites in many different markets. Even markets I knew nothing about, It didn't matter, My job was to find markets and build sites.

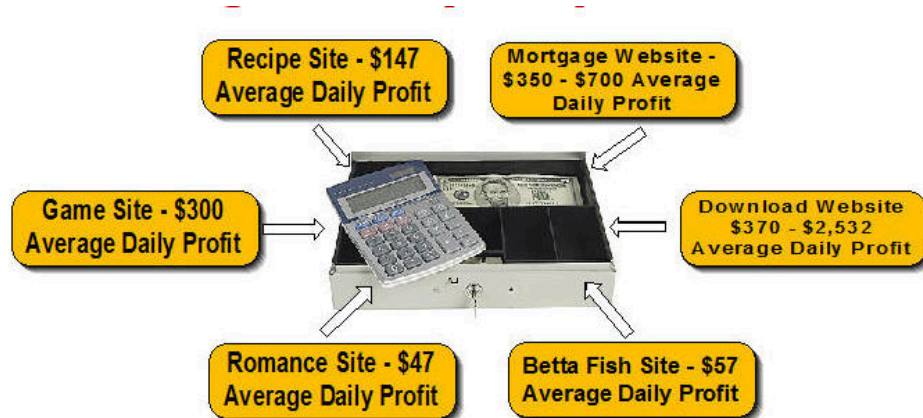

This new venture of mine took off like wildfire almost immediately... my first full year as an affiliate marketer I was pulling in over \$500-600 a day in profit.

People Thought I Was Crazy... But I Was Able To Make Money:

- **Without My Own Product**
- **Without My Own 'List'**
- **Without An Elaborate Website**
- **And Without Having A Bunch Of Money To Start**

The best part about it was that there were no hard advertising so...

I was running a 90% killer profit margin on my simple sites...

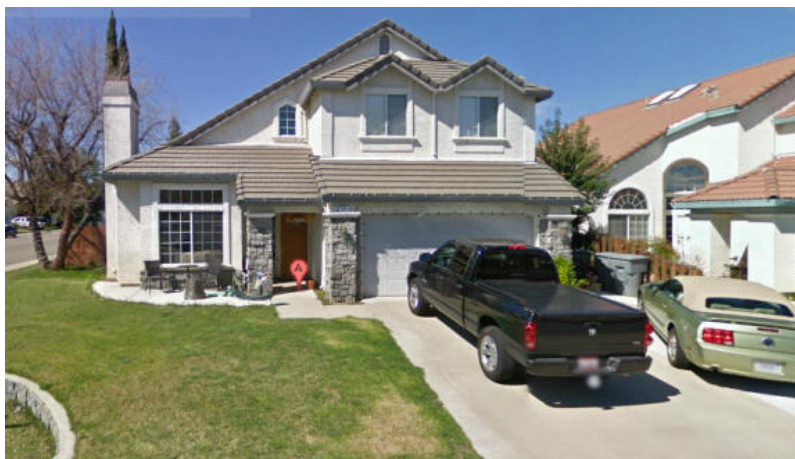

This proved to be very lucrative, I was able to get out of my rut, buy my first house in northern California, live comfortably, and feed my family well all while having fun, taking vacations whenever we wanted and hanging out with the family all day.

I have been at this for many years.... building simple little sites, focusing on what people want, and cashing my checks like clockwork.

It wasn't always smooth sailing though.

In 2004 my business almost completely crashed due to a major change in search engine algorithms. Taking me from an average of \$1000 a day in profit down to about \$150 a day in profit... THAT HURT... BAD!

That crash was only a few months after I had purchased my first house at age 24... and now had 3 mouths to feed... plus my own. So I had to do something fast.

Knowing what I knew about direct marketing and website building (which I am going to teach you) allowed me to bounce back in just a few months at get back to about \$10-15,000 a month in profit.

When You Learn How To Become A Good Marketer... You Will Never Be Out Of Work - No Matter How Bad The Economy Gets, How Competitive The Market Gets, Or How Much The Internet Changes

After that first little 'speed bump' came my new **Simple Sites Big Profits** method that has been working well for the past nine-ten years... the principals are the same and the format is the same, but now it is much easier to get traffic to your simple sites. We still use a lot of the old methods... just up to date with blogging and all the new easy fun stuff.

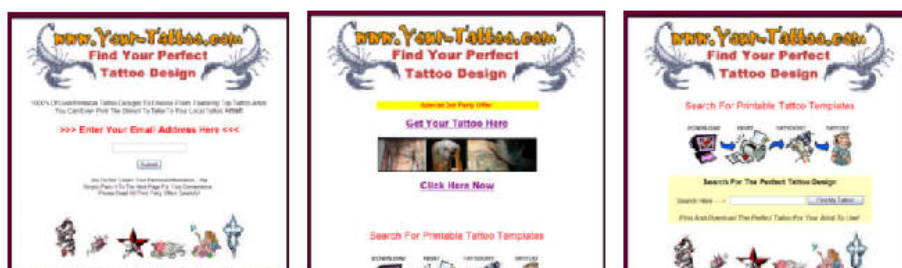

Now you can actually get traffic to your website in as little as 30-40 minutes and be making money by the end of the day, and...

**Search engines love my sites because they help people find
what they are looking for in a fun and easy to use way**

One morning after the "big crash", I woke up rather early and the kids were still in bed, grabbed a cup of coffee, and decided to make a **simple little website** for people who search for tattoos online. Over 100,000 people a day search for tattoos so I thought it would be a good market to tackle.

The site was finished before my 2nd cup of coffee got cold... **it only took me 45 minutes to build start to finish.** And ***by the time I went to bed that night it was already making money.***

Here Are Some Pictures Of That Site

This Site Has Generated Me As Much As \$150 - \$300 A Day In Profit

After building this site I had called a buddy of mine who was also an internet marketer said...

"DUDE.... I THINK IM ON TO SOMETHING!"

Going on to explain to him how if I could just make 10-12 of these sites... I could be pulling in an extra \$1,500 a day in PROFIT!

As you may have guessed, his reaction was something like this...

"Marcus, It Cant Be That Easy... You Just Got Lucky... It Doesn't Work Like That!"

So I got kind of upset... WHO WAS HE TO BURST MY BUBBLE!!!

You know what I did then?

Yep... You guessed it...

I set out to prove him wrong

Starting with a simple little website about mortgages... that one made me \$300 a day most of the time... sometimes **as much as \$1700 a day in revenue**... over 60% profit!

Then I set up a simple little website about beta fish... that one made an average **\$57 a day in profit** and it was a simple little one page website **I made in about 20 minutes.**

It was easier than I ever thought it would be...

I made sites for over thirty different subject matters... and like clockwork... they brought in money... some made just \$5 - 10 a day, some made \$100 and some made over \$1,000 a day in profit...

I gotta be upfront here, it did take some work managing all these sites.

And Obviously The Results Are Not Typical Implied Or Guaranteed... The Average Would Be Affiliate Marketer Never Earns Anything... But Some Do Really Well And I Am Going To Show You What THOSE Ones Do!

But I cant think of anywhere else you can make a great living from the comfort of your own home setting up little websites about anything you want and spending just **3-5 hours a week** managing them.

**This Is A Fun And Exciting Industry -
If You Are Willing To Work It**

Now here I am 25 years later in 2025 still running my simple sites, still making big profit. Still working from the comfort of my own home and still enjoying staying home with my family.

We have had some setbacks... but what doesn't kill you makes you stronger right?

What used to take days now takes minutes, and the results are better than ever. My students are building AI-powered sites that make money while they sleep - some earning \$100-\$500/day completely automated!

So what's the catch?

If this information is so profitable why in the world wouldn't I lock myself in my office and build sites for the rest of my life...

Why would I even bother showing you how to do this business?

First, it takes nothing away from me to let you in on everything I have discovered over the past 25 years about how to work from home as an affiliate marketer.

Each person has their own unique outlook and their own unique way of running this business.

Not to mention the fact that I could work all day every day and still not tackle all the niche markets that are available online.

Secondly... I believe in giving back. I have been blessed by being able to work from home and enjoy my life and I only feel its fair to help others. That is why you will find my program to be far less expensive than other programs offering less than half of what you are going to learn in Simple Sites Big Profits.

Thirdly... I am a business man and I have worked out a deal with my advertisers to give me a bonus based on what my students make... it doesn't come out of your check... its a little perk I get for teaching you and working with you to help you make money online.

My Incentive Is To Help You Make A Ton Of Money, So I Get A Bigger Bonus Check

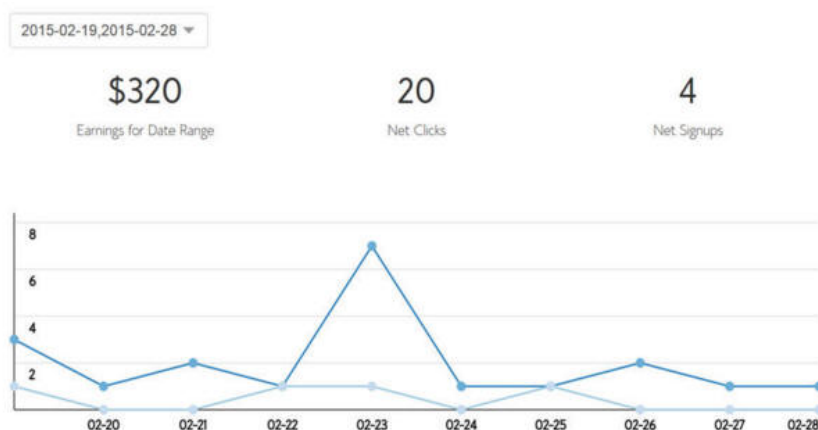

Just to show you how this works, I taught a few friends of mine how to do this business and so far they have earned me over \$103,471 in bonus checks. Not to bad for spending a few hours showing some people how this business works... Just Imagine What They Made!

So now my goal for 2021 is to get more students and teach them thru my simple sites program and hopefully they will use my advertisers (since they are the best and pay the most) and Ill get a nice little kickback. This is how I can afford to offer you personal support.

As you can see my goal here is to be real and transparent with you and help you learn exactly how you can make money online from the comfort of your own home.

If You Are Ready To Partner With Me And Make Money Together

Recently some people have been asking me if this method still works with the how the economy is, and the way the internet is always "changing" so I decided to post the results from a simple site I put up on FEB 19, 2015 Just About A Year Ago...

As you can see it took about two days for the site to start gaining momentum... but then it took off like crazy. Not bad for a little that only took an hour and a half to build. The cool thing is that these sites keep making money month after month with very little up keep or maintenance.

So, What Is The Big Secret To Making These Simple Sites Work?

Simple Sites Work Because They Are Based On What People Are Searching For Online...

Think about this for a minute... every single day 100's of millions of people are searching for something online... they could be looking for anything from recipes, to new car prices, to how to tie a necktie. (which is actually looked up quite a bit)

So you have hundreds of millions of people searching... and you have thousands of advertisers willing to pay TOP DOLLAR for new customers.

Does This Idea Make Sense To You?

Lets have a little example... Did you know that a simple little 1 minute advertising spot during the super bowl cost millions of dollars... for one tiny little minute.

So... companies like Coke, Pepsi, and others are using this minute to try to get as many people interested in their product as possible. AND THEY HAVE NO CLUE WHO IS BEHIND THE TV SCREEN. All they know is that the people like football.

So lets take this to the online world... the chances of me getting as many people to my site as watch the superbowl are pretty slim... BUT I can get a much more targeted audience.

Lets have a (hypothetical) example... I'm sure you have all seen ads on tv for the "Sleep Number Bed."

Again... millions of dollars going out to an untargeted crowd... oh sure they can advertise at night when the people who cant sleep are up... but its still a shot in the dark.... no pun intended :o)

So here you have a company with a huge advertising budget... what do you do?

Well for one... lots of people every day search for words like "cant sleep" "sleep apnea" "sleep remedies" and things of that nature... heck you can even go for words like back pain and eye strain.

Now with these keywords you have a targeted crowd who would probably be interested in this sleep bed product.... lets say the maker of the bed is willing to give you \$50 just for getting someone from your website to get a free sleep DVD about the sleep number bed. (they probably pay a lot more using T.V. ads... so this deal would be very reasonable.. and you don't even have to make the deal... just use the companies you will find in your kit... they manage hundreds of programs and do all the dealing for you!)

With A Deal Like That... Do You Think You Could Make Money?

OF COURSE YOU COULD... and this is exactly what I have been doing for the past 19 years.

**And My Interactive Tools Show You All The Ins
And Outs Of How This Works So YOU Can Get Paid Fast...**

You could even make a site about sleep tips, run ads for sleep number bed and get paid for each click... as of writing this the cost per click on those terms is about \$12-19 a click.

That means you could buy the clicks for "cant sleep" for 10-15 cents... and get them to click ads for "Sleep Number Beds" paying you up to \$12 a click or more!

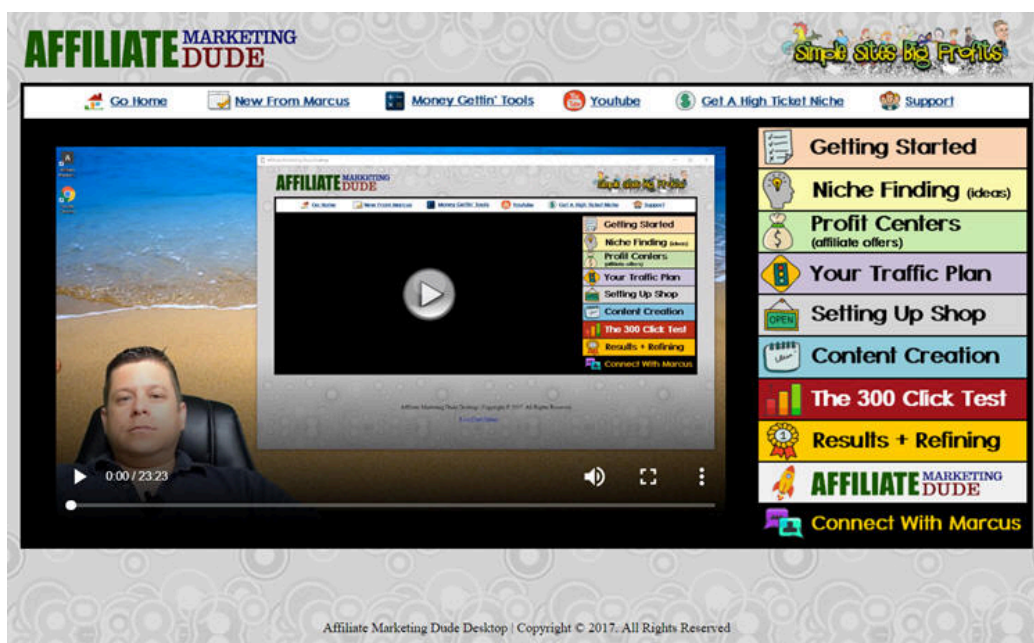

Of course not everyone will click... but **imagine getting \$3,4,5 or even \$10 a click** on just half the people who come to your site.

Starting to get the picture of how this whole "Make Money Online Thing" really works?

This isn't your run of the mill training program that leaves out the "major" details, and leaves you fending for yourself while the 'guru' gets rich...

These Are The Real Secrets Of How Thousands Of Every Day People Just Like You Are Silently Making Fortunes Online Using Direct Marketing And Search Engine Advertising. You Won't Find This Info Anywhere Else...

Have A Look Inside Your Brand New In Depth Training Program...

**As You Can See This Is A Sure Fire Paint By Numbers System That Will Have You Building
Simple Sites For Big Profits In No Time...**

Here are the basics of how the 'Simple Sites' system works...

1. Find What People Search For (I Give You The Tools With Your Kit)
2. Set up simple sites that give users what they want.
3. While giving users what they want... run ads that pay you for your visitors

Its the same thing Oprah and doctor Phil do all the time.

They get peoples interest, make a show, and the advertisers pay them HUGE...

Why... because advertisers want people to see their ads.

You Can be the middleman and get paid big for having ads on your sites.

Allow me to illuminate:

- Did you know... **You Can Get Paid** when someone clicks on sponsored links?
- Did you know... **You Can Get Paid** when someone downloads certain programs?
- Did you know... **You Can Get Paid** when someone fills out forms online?
- Did you know... **You Can Get Paid** when someone buys something online?
- Did you also know... right now as you read this... **huge companies** like google, yahoo, amazon, clickbank, ebay, and countless of others are **paying billions of dollar each year to people just like me and you?**
- Did you know that right now as you read this... my personal "Simple Sites" are making me money... I could be sleeping, playing with the kids, or on vacation and my "Simple Sites" are making me **money 24 hours a day!**

As you can see there is a lot of money at steak here. The affiliate marketing industry pays out billions and billions of dollars to people just like me and you. Normal everyday people who run simple websites.

But... Until now it has been pretty much impossible for someone to learn everything in one program. Sure there are programs out there that teach some good tips and tricks but...

Most Training Programs Do Not Teach You The Whole Story...

After watching this industry for over fifteen years I have found that most other programs don't teach you the whole story. They may teach you some good tips and tricks but never get into the whole truth about how to be an internet marketer, how to get traffic, how to get paid, and how to set up your sites fast.

The main thing people dislike about 'training programs' is the fact that if you ever need help you're pretty much stuck... Most 'Gurus' leave you to fend for yourself.

Some of the 'nicer' guys will let you purchase coaching for an additional \$1,000 or \$2,000 or more.

My personal coaching fees alone are well into the \$1000's of dollars...

Here is what you'll find in your "Simple Sites Training Program"

Jermaine Steele My journey was working at a fast food restaurant slaving away for 12-16 hours daily!

I came across affiliate marketing when I 1st stepped online.

I started to promote Clickbank and Simple Sites Big Profits not knowing ANYTHING about marketing.

I bought a \$250 course Simple Sites, Big Profits plus software which I SPLIT with my boss.

(She 7 years later now works online with us) 😊

That course (which came with a 96 page PDF as I vividly remember and STILL have)

That PDF and course helped me to better understand the affiliate marketing SEO process.

I then took what I learned between that and Brian Monster Profits Johnson m.

Crafted my 1st of dozens upon dozens of affiliate sites/offers based around Halloween.

I went 50-60k in debt trying to "figure" out the sustainability side.

Lost my job in 2011 after 2 months buying my 1st home.

Being that I had/have nephews to raise as well as 2 of. My own boys.

I spent 9 months figuring things out online while FINALLG finding blogging was my strong point.

That lead to video and after 2 years of "struggling" we haven't had a month under 20-30k since June 2012.

After finding video as a strong point. I started my own movement and community based around Traveling/affiliate marketing.

Helping 1000s to great affiliate marketing incomes.

100s to create Amazon income as well as dozens to create 6-7 figures DIRECTLY!

Affiliate Marketing dude AKA Simple Sites Big Profits bro!!!

I know you asked for a story but my testimony comes within that!

Thanks for being YOU when I needed it. Looking forward to catch up and OH this is all verifiable 😊

I'll take a pic of the crumpled 96 page PDF that helped me understand the basics of branding etc. Shoot Marcus Campbell might have even been a white label PDF at the time with hindsight.

But all that matters to ME and my family is that when I NEEDED to come across that PDF .

YOU we're the one who put it out in order for me to learn, stay focused and find me way sailor.

For that DUDE, I'm forever grateful! Can't wait to learn More about the 2018 Marcus Campbell 🙌

My real life testimony and it's OHHH so much more struggle and deep lol

But I share the Glory to inspire anybody who may read this 🙌🙌🙌

Marcus, I want to personally thank you for teaching me through the simple site sites program. I have been online for more than 3 years and until I was introduced to your program, I wasted money buying program after program. Your simple sites program, showed me how to create several simple but effective sites that has brought me over \$11,233 dollars so far in 2013. I would recommend at least investigating this program for yourself. Marcus has two main programs that I have purchased and implemented myself. I went so far as to provide reviews. Here is Blog Profit Network Review. is one. Check it out and see for yourself. Bought, verified, and tested that the system works. Questions post and I will answer Mario Malone

HIS LAST ATTEMPT FOR INTERNET MARKETING... SIMPLE SITES PAID OFF!!!

702chris Warrior Member Join Date: 2013 Posts: 0 Thanks: 0 Thanked 0 Times in 0 Posts	Over 2,500 Sold - Simple Sites Big Profits... The Original CPA Affiliate Guide... I joined Marcus's Blog Profit Network and Bootcamp series late in 2012. I discovered it via a webinar through another program I purchased focusing on Amazon. It was an all encompassing course and was continually growing frustrated because those owners seemed to be making too much and no time to support on a \$2k product. Enter Marcus, his message was simple, his ideas and how he makes money seem to resonate day in, day out, year after year, not just the new sexy Susan. Flip the Market is something he teaches. Does that make sense, no? Check it out! Another thing that is nice is, he has live chat, where he can be found for several hours a day. He is in California so let it be known PST. You can ask him all your questions. In the last couple months, he has added to the support by employing very real, LIVE persons. I think the biggest thing is accountability and if you cannot catch either him or his support staff on live chat well then, just catch them on live chat! They are hanging out alot. My income is not where it needs to be, but I suffer from the shiny toy object syndrome. I am really focuses on this system. Attend a bootcamp meetup and meet faces with names that you see on training webinars and solidify relationships as you learn to make \$\$\$\$☺

Marcus, What Do I Need To Know Before I Get Started?

1. What Kind Of Budget Do I Need To Start With?

After getting simple sites we recommend that you have at least \$80-100 to start with web hosting and other items you may need along the way... you can use your current hosting if you wish.

2. Can I Host Multiple Sites On One Hosting Or Do I Need A Bunch?

As long as you have a host that supports multiple domains per account (usually a shared account you can get for a few bucks a month will do) this will allow you to host 20-30 simple sites :-) on one account.

3. What About Domain Names... Do I Need A New Name For Each Site?

You will want to get a new domain name for each category site ie: fitness, mortgages, ect... you can however have multiple fitness type sites on one domain.

4. Do I Need A HUGE Pay Per Click Budget?

Nope not at all... actually we start very small and increase our budget only after seeing some results. You can usually test a new site with less than \$30 and many times if you follow our directions you will at least break even or even make something on the test... and on top of that we show you how to get over \$200 in free PPC ad coupons with your new site set up... so you can test your new ads "on the house" :)

5. How Much Time Per Day Should I Dedicate To Simple Sites To Be Successful?

We recommend 15 - 30 minutes per day actively working on specific tasks (found in your daily task guide) to start seeing results. Keep in mind your work will add up over time to big numbers so you can start making even more daily even when you are not working. However you can work as much as you like :-)

6. How Fast Can I Start Seeing Results?

This is a lot like the "how much can I earn" question... it really depends on you as a person, the work you put into it, and how focused you are. With that said there are ways to start earning starting today if you really want to... you just need to focus and work at the things that get results.

Remember 90% of this business is mindset... you must focus on the fact that people are always online, they are always searching, and someone is gonna make money today.. might as well be you :-)

7. Is The Whole Idea To Run 1,000 Sites That Make \$1 A Day Each?

While this can work... it simply gets to be a bit much to handle for anyone ;) I would focus more on starting with 3-5 sites... watch which ones have potential and build them up. Some of your simple sites may do a few bucks a day, some \$27 a day, some may do 100s or 1000s per day... the key is to let the little ones make their money while you work at making the big ones even bigger. Its much easier to take a site from \$10 to \$100 a day than it is to build new ones. So focus more on building the ones you have rather than just making as many as possible. My simple sites software will show you how to nurture a site to massive profits pretty fast...

It was important that these plugins be made by me. Not some auto generated, get you banned from google crap. Not some lame untested plugin by a marketer who only sells crap to other marketers. This needed to be based on real world stuff in niches that have nothing to do with clickbanks, adwords, or anything.
